Highlights

The labor force participation rate is a measure of the labor force as a percent of the 16+ civilian non-institutional population. During the latter half of the twentieth century, the labor force participation rate increased dramatically, largely driven by an increasing number of women joining the labor force. Since 2001, the rate has steadily declined, exacerbated by the 2001 and 2008 recessions. While over the month the labor force participation rate fell by 0.4 percentage points, it has risen by 1.4 percentage points over the year.

MI Rank 39

Highlights

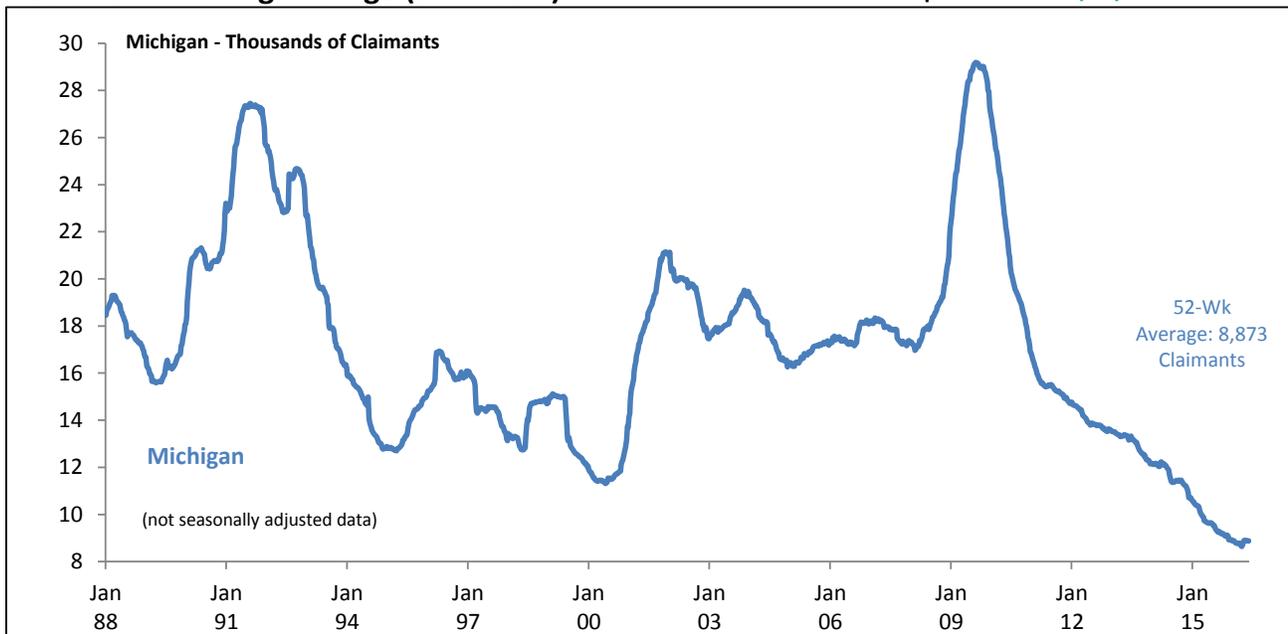

The U-6 is an alternative measure of labor underutilization. The U-6 includes the total unemployed, plus all marginally attached workers (individuals who have given-up looking for work), plus total employed part time for economic reasons, as a percent of the civilian labor force plus all marginally attached workers. By definition, the U-6 is higher than the U-3, the official unemployment rate. In Michigan, the U-6 measured 10.8 percent for the twelve month period ending in the second quarter of 2016, the lowest rate since before the beginning of the Great Recession. The U-6 for the U.S. is 9.9 percent.

Highlights

Michigan's share of U.S. payroll jobs remained at 3.00 percent. After dropping to below 3.0 percent in 2009 and 2010, Michigan's share of U.S. payrolls has consistently hovered near 3 percent since 2011. Since 1990, Michigan has seen its jobs as a share of U.S. jobs steadily decline, reflecting significant job losses in Michigan.

Summary: 2015 Q3

Gross Job Gains	195,118
#Δ / Year	4,036
%Δ / Year	2.1%
Gross Job Losses	204,087
#Δ / year	-1,020
%Δ / year	-0.5%

Highlights

Gross job gains are the sum of increases in employment from expansions at existing establishments and the addition of new jobs at opening establishments, with zero employment in the third month of the prior quarter. Gross job gains for 3rd quarter 2015 were higher than the prior year by 2.1 percent due to job gains from business expansions.

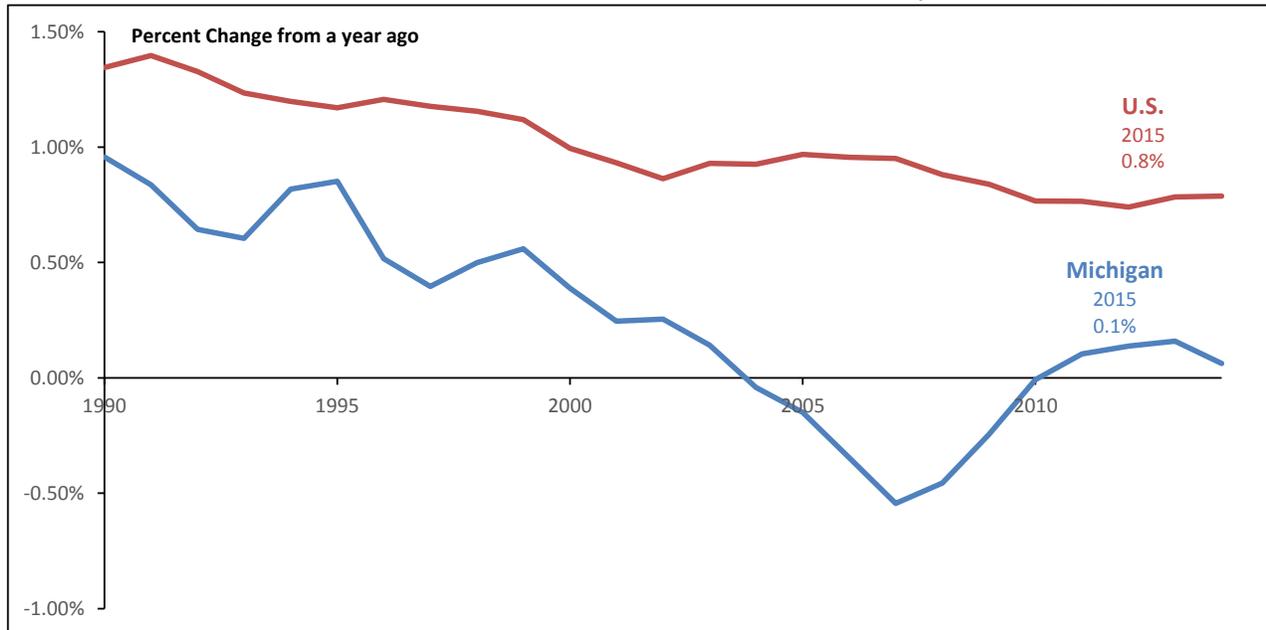

Gross Job Losses are the result of contractions in employment at existing establishments and job losses at closing businesses, with positive third month employment in the prior quarter and none in the current quarter. Gross job losses were down by 0.5 percent over the year primarily due to fewer losses from business closings. Gross job Losses exceeded gross job gains by 8,969.

Summary: June 2016

LV Sales (mill)	16.6
#Δ / month	-0.8
%Δ / month	◆ -4.5%
#Δ / year	-0.3
%Δ / year	◆ -2.0%

Highlights

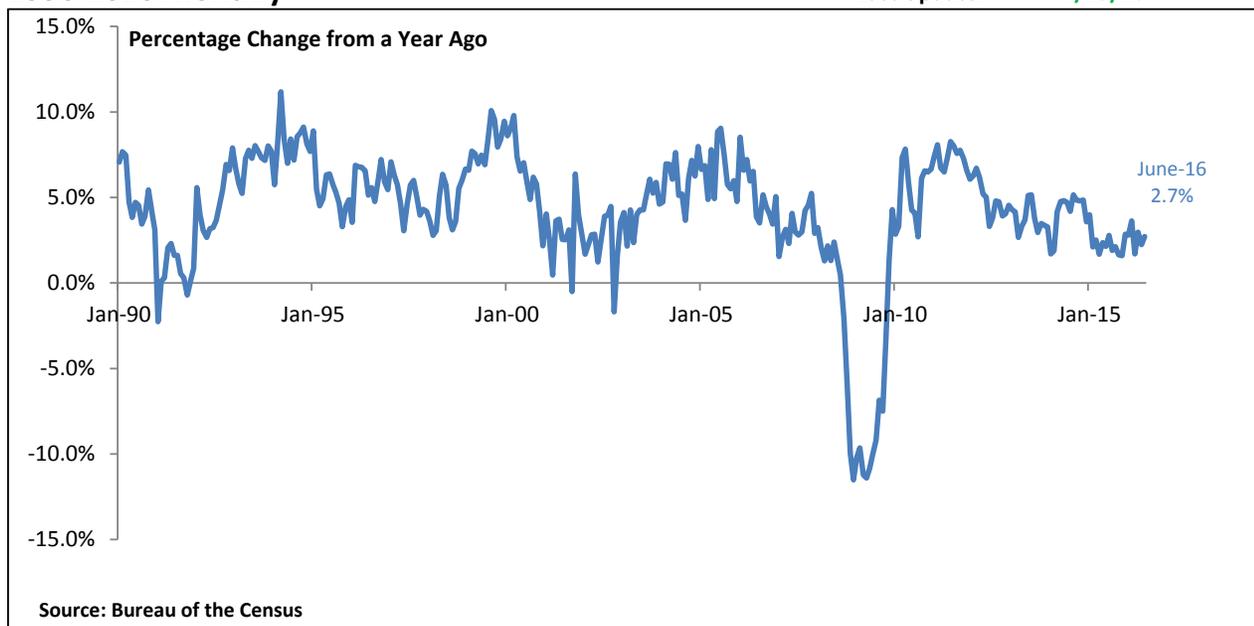

Light vehicle sales decreased 4.5 percent in June from May to a 16.6 million unit annual average rate. As pent-up demand from recent years abates, the sales rate will likely be more volatile in the coming months and below the recent monthly highs of September 2015 through November 2015. Strong employment and low gasoline prices, however, will provide support for sales. From a year ago, light vehicle sales were down 2.0 percent in June.
